PROFESSIONAL SUMMARY

IT and Network Professional with over 4+ years of hands-on experience in enterprise network management, server administration, cloud computing, and DevOps. Skilled in configuring and troubleshooting LAN/WAN, VLANs, firewalls (Sophos XG), virtualized environments (VMware ESXi), Windows/Linux servers, IIS/Nginx hosting, database management (SQL Server & MySQL), cloud deployments (Azure), and automated CI/CD pipelines. Proven ability to design scalable, secure, and highly available IT infrastructures.

EXPERIENCE

Network Executive

Logicose Pvt. Ltd

July 2025—Present, Karachi, Pakistan

- Configured and maintained **LAN/WAN infrastructure**, switches, routers, VLANs, DHCP, DNS, and firewall rules.
- Managed and maintained servers based on Windows Server and Linux environments
- Installed, configured, and monitored server infrastructure for high availability and performance
- Administered user accounts, access control, and security policies
- Performed regular data backups and ensured successful recovery processes
- Implemented security measures including firewall configuration and system updates
- Monitored system performance (CPU, RAM, Disk) and resolved technical issues
- Managed network services such as DNS and DHCP
- Troubleshoot server and network-related issues to minimize downtime
- Managed **Windows & Linux servers**, deployed VMware ESXi VMs, and implemented two-tier architectures (IIS + PHP, MySQL).
- Provisioned **Azure VMs** with custom DNS, HTTPS via Let's Encrypt, Load Balancer, and AD DS for enterprise applications.
- Built **CI/CD pipelines** using Jenkins, GitHub, resync, and Docker; implemented Smoke Tests and automated rollback.
- Hosted **ASP.NET MVC and PHP applications** with full database integration, ensuring LAN & secure external accessibility.
- Implemented **security and monitoring**: SSL, firewall rules, NSG, uptime tracking, and resource management.

Key Achievements: Improved uptime and fault tolerance for enterprise apps; strengthened skills in virtualization, cloud, DevOps, and network administration.

System & Network Administrator

Burooj Institute

Feb 2024—Jan 2025, Karachi, Pakistan

- Assisted in managing and maintaining servers based on Windows Server and Linux
- Supported installation, configuration, and updates of server systems
- Created and managed user accounts and access permissions
- Monitored basic server performance and reported issues
- Assisted in data backup and recovery operations
- Implemented basic security practices such as antivirus updates and firewall configuration
- Provided support in troubleshooting server and network-related issues
- Maintained system logs and documentation
- Maintained institute network, VLANs, and switches for optimized connectivity.
- Managed live streaming via Microsoft Teams for lectures and meetings.
- Procured IT equipment and managed vendor relationships.
- Provided user support, resolving system/network issues efficiently.

System & Network Engineer

Ilma University

Jan 2023—Jan 2024, Karachi, Pakistan

- Configured and maintained network infrastructure (routers, switches, VLANs).
- Installed and configured Windows Server and basic Linux systems
- Created and managed user accounts and permissions
- Learned backup and recovery techniques
- Practiced basic server security and firewall configuration
- Monitored system performance and logs
- Supported faculty/students in troubleshooting, software installation, and connectivity.
- Managed classroom technology setups and enhanced security/efficiency with new solutions.

PROJECT -Visit to my LinkedIn profile: <https://www.linkedin.com/in/muhammad-anas-raza-882327259/>

CI/CD Pipeline & Containerized Deployment (DevOps)

Technologies: Jenkins, Docker, Kubernetes, ArgoCD

- Designed and implemented CI/CD pipelines for automated build and deployment
 - Built Docker images and managed repositories on DockerHub
 - Deployed containerized applications on Kubernetes clusters
 - Implemented GitOps-based deployment using ArgoCD
 - Integrated security and quality checks in deployment workflow
-

Cloud Deployment & High Availability (Azure)

Technologies: Microsoft Azure

- Deployed and managed virtual machines on Azure cloud
 - Configured virtual networks, NSG rules, and DNS settings
 - Implemented load balancer for high availability and failover
 - Ensured secure and scalable cloud infrastructure
-

Virtualization & Two-Tier Architecture (VMware ESXi)

Technologies: VMware ESXi, Windows Server, Linux

- Installed and configured VMware ESXi for virtualization
 - Deployed Windows and Linux virtual machines
 - Designed two-tier architecture (Web Server + Database Server)
 - Established secure communication between application and database servers
-

Linux Server Deployment & Web Hosting

Technologies: Linux, Nginx, MySQL

- Deployed static and dynamic websites on Linux server
 - Configured Nginx, virtual hosts, and file permissions
 - Integrated MySQL database with web applications
 - Ensured application availability and server performance
-

Windows Server Administration & Application Hosting

Technologies: Windows Server, IIS

- Configured and managed Windows Server environment
 - Deployed web applications using IIS (PHP & ASP.NET)
 - Managed user access, permissions, and system settings
 - Monitored server performance and ensured uptime
-

EDUCATION

Bachelor of Information Technology

University of Sindh Madressatul Islam - Karachi 2026

Diploma in Mechatronics

Pakistan Swedish Institute of Technology - Karachi 2021

Matriculation in Science

Arif Hussain English Medium School - Karachi 2018

SKILLS

Technical Skills:

System Administration:

Windows Server, Linux, Active Directory, User & Access Management, Backup & Recovery, System Monitoring

Networking:

LAN/WAN, VLANs, Routing & Switching, DNS, DHCP, Firewall Configuration, Network Troubleshooting

Virtualization:

VMware ESXi, Virtual Machine Deployment, Two-Tier Architecture

Cloud Computing:

Microsoft Azure, Virtual Machines, VNet, NSG, Load Balancer, AD DS

DevOps & Automation:

Jenkins, Docker, Kubernetes, GitHub, ArgoCD, CI/CD Pipelines

Web & Hosting:

IIS (ASP.NET, PHP), Nginx, MySQL, SSL/HTTPS

Security & Monitoring:

Firewall Rules, SSL (Let's Encrypt), System Security, Uptime Monitoring

Soft Skills:

Problem Solving, Troubleshooting, Team Collaboration, Time Management
